Course Title: N 395 Community and Global Health

Course Description:
This course applies concepts of community health and public health to both individual and family health promotion cases. Students will discuss disease prevention in the context of emerging community and global diseases. Students will also address principles of population health and epidemiology.

Course Objectives:

At the end of this course, the student will be able to:
1. Examine the historical highlights in public and community health.
2. Discuss the use of technology to help make decisions and improve the health status of the individual, family, and community at the local and global levels.
3. Demonstrate knowledge of the assumptions underlying traditional and holistic.
4. Views of health, healing, and conducting patient assessment.
5. Examine the relationship between nurses in communities with other core components of any healthcare system.
6. Explore the gap and challenges between theory and effective, community health nursing practice.
7. Incorporate multiple viewpoints and education to promote a healthy lifestyle in a selected public and specialty population area.
8. Evaluate population-based nursing directed toward health promotion and disease prevention in the community as well as disaster nursing.
9. Define key concepts of community nursing such as cultural connections, environmental connections, critical thinking connections, global connections, media connections, epidemiology, research and statistical data, and much more!
10. Understand one's role and participation in emergency preparedness and disaster response with an awareness of environmental factors and the risks they pose to self and patients.
11. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends.
12. Compare the benefits and limitations of the major forms of reimbursement on the delivery of health care services.
13. Examine legislative and regulatory processes relevant to the provision of health care.
14. Discuss the implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.
